

SUPERNOVA®

WAIZ SUPERNOVA is the latest creation of my production!

It's a short scale guitar (it has the same scale of the tenor ukulele, 430 mm) that can be tuned like a classical guitar or an octave higher!

Supernova is the perfect choice if you want to experiment an amazing small guitar with an incredible sound!

The HEAD of Supernova is available in Fish skin or Synthetic (Remo fiberskyn);

The FRETBOARD of Supernova is available in three possible selections: Eco ebony, Ziricote or Rosewood.

Supernova can be free of FRONT DOTS or realized together with Abalone or Brass front dots.
